

Your Name

On my honor as a University of Colorado at Boulder student, I have neither given nor received unauthorized assistance on this work.

*Note regarding unauthorized assistance: I would prefer that you learn as much about Machine Learning as possible throughout your project. Therefore, I encourage you to talk to anyone and everyone about your project. Feel free to involve collaborators somewhat deeply, but in order to learn, you will of course need to do a significant amount of work yourself. I expect all written assignments to be your own work and reflect **your** understanding of that work. That said, your paper should reflect feedback from your class peer group as well as from me.*

For each paper:

Complete reference information

Date of review

Brief descriptions of:

- the problem they are addressing,
- their approach,
- their results,
- what was important, interesting, clever, and or you liked about the paper,
- what could have been done better, and
- how you can use, benefit from, and or integrate the work in your own work.

The first three can include or consist strictly of quotes from the paper; in which case, enclose the text in quotes so you remember not to use it verbatim without citation in your paper.

Check the Literature Review description for some of the details that might fall under the category of things that you might be interested in documenting about a paper.
